EXPERIENCE

February 2020 – March 2020

Junior Developer Intern, IOOF HOLDINGS

During my 1 month internship I worked with a fellow intern on a small scale front end project with a mocked backend. The project was to be a prototype of a client application they would use in the future. Throughout the project we were expected to use an Agile workflow that included 2 sprints we tracked using Jira, we would also integrate with UX on meeting their design expectations and our code would be reviewed by our lead. We would use many technologies to complete our project as well as integrate with IOOF's pre-existing libraries, the front end application was built using mainly ReactJS and React Redux, the mocked back end of the application was built locally using React Cosmos, MirageJS as well as using Redux Saga to manage asynchronous calls. We were also expected to test our application for which we used Jest and React Testing Library.

October 2015 – August 2019, August 2020 - Current

Store Manager, EB GAMES

My responsibilities included:

- Achieving/Meeting daily, weekly and quarterly store KPI goals
- Assist in hiring, and the promotion of new and current employees
- Coach my team on sales and KPI performance providing feedback and recognition
- Provide consistent training to employees effective to their role and personal
- Priorities tasks and delegate them to myself or my team accordingly, motivate staff to strive for excellence in the completion of these tasks
- Be a positive brand ambassador actively display an attitude which reflects the EB Ethos values (Family, Integrity, Vitality, Vision, Accountability and Recognition)
- General day to day business operations (Including: Inventory Control, Rostering, Maintaining the store)
